

**COMBI
SHOTS**

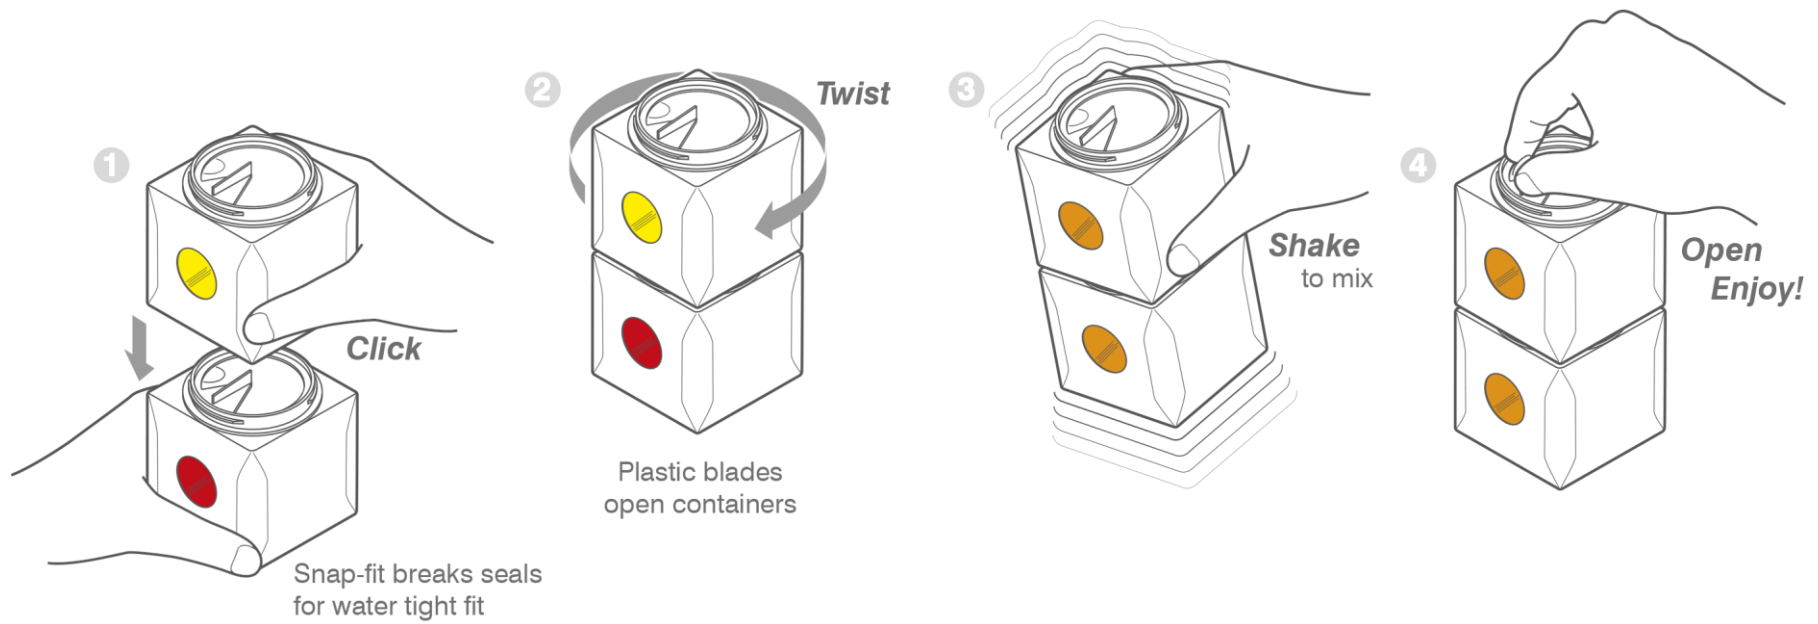

WHAT?

CombiShots is a multicontainer connection system

We have developed two engineered rings to be applied to any conventional container having opposed openings

Pick 2 (or more) containers you want to combine.
Click, twist and **shake** to mix contents. **Simple!**

WHY?

Many substances need to be mixed right before use

Pharmaceuticals: drugs to be mixed right before an injection or during surgery

Drinks: to be mixed to be consumed immediately

Allergies

Let the consumer decide what to drink. Pick and choose the flavours to create the perfect smoothie drink

Beauty products

Keep the ingredients fresh for longer

The consumer mixes powders, creams, fluids or liquids upon choosing their favourite colour, fragrance, gloss, UV protection, wrinkles miracles, and other magical beauty properties

It gives people total freedom of choice, what to consume, the quantity, and how much to spend.

PLUS

**IT'S INNOVATIVE!
AND IT'S FUN!**

**COMBI
SHOTS**

WHO?

Primarily developed for the drinks market, **CombiShots** can be used in a variety of sectors where the contents of 2 or more containers need to be mixed.

Drinks

Juice
Smoothies
Cocktails
