

Are you tired of getting mediocre results from aerosol spray cans? The LaserCan is a revolutionary technology that uses surface illumination and laser targeting to significantly improve your spray paint quality. Additionally LaserCan incorporates the power grip for unsurpassed control and comfort.

lasercan™

helps prevent
dripping

Like laser targeting systems used by professional painters, the LaserCan reduces dripping by precise targeting and lighting.

helps prevent
overspray

The LaserCan allows you to perfectly target the surface to get more paint on the part and reduces wasteful overspray.

saves
money

Proper transfer efficiency of paint can reduce cost by more than 50%.

earth
friendly

Better transfer efficiency can reduce polluting Volatile Organic Compounds (VOC's) emissions by more than 50%.

power
grip

The power grip significantly improves both comfort and control.
