

**THE "CAR SEAT ALARM"  
CLIPS IN BETWEEN SEAT  
BELT CONNECTION**

- The "Car Seat Alarm System" is an innovative child safety product that is designed to notify the parent who walks away from the car that the child is still strapped into the car seat.
- Attaches to the seatbelt that is used to secure the child into the car seat.
- Alarm will sound if user walks 25 feet or more from car while infant is inside and strapped into car seat.
- Perfect for parents, grandparents, babysitters and other care-givers.
